[Chapter 4] A city of industry that is full of vitality

As the times change at rapid speed, we are supporting agriculture, industries and commerce so that they could develop into industries that are adapted to the new era.

[Chapter 5] A city that is in symbiosis with its abundant natural environment

The four seasons of our hometown Ojiya let us feel spiritually rich. We are creating a city where each individual can live comfortably, as we bring together our beautiful nature and our convenient and amenable urban functions.

[Chapter 6] A city where people are in contact with one another

We are adding vibrancy to our city by developing attractive tourism resources and attracting many people. We are supporting the gatherings of our inhabitants such as festivals and local ctivities to nurture contact and ties.

[Chapter 1] A city with a cultural atmosphere that nurtures its people

City development equals human development. We are developing people who are sound in both body and mind and are full of creativity through the improvement of school education, and the promotion of lifelong learning and sports.

[Chapter 2] A city in a beautiful environment that is safe and pleasant

Safety and peace of mind are required for people to continue to live in Ojiya. We are promoting the development of a city that is resilient against the snow, and one that protects its inhabitants from natural disasters, as we strive to eradicate traffic accidents and crime.

[Chapter 3] A city where people can live in healthily and with a peace of mind

We are creating a city where everyone can live healthily in both body and mind, where the lives of those who are raising children and the elderly are supported by the community and the whole city, where they can receive full medical and welfare care.

「小千谷市民のねがい」 昭和55年3月1日制定 都市像 創造、伝統、自然が織りなす 誇りあるまち おぢや 第四次 **小**千谷市総合計画 平成18年度~平成27年度

For tomorrow and the future Six ideas for the city's development

We are aiming to make 'Ojiya, a city with pride, pieced together by creation, traditions and nature'. An affluent city where every one of its residents is healthy and can live a life of meaning in an environment that is in harmony with nature. We are proceeding with six basic goals to realize a highly creative city where the city's inhabitants and the local authority work in partnership.

中越大震災から10年。 あのとき様々な困難の中で生まれた子どもたちも、 こんなに大きくなりました。 子どもたちは復興した小千谷の姿であり、 小千谷の未来でもあります。 私たちは子どもたちにどんなふるさとを 残してあげられるでしょうか。
